JAMES &
NICHOLSON

PRODUCT GUIDE

WORKWEAR

A PERFECT APPEARANCE

JAMES & NICHOLSON OFFERS THE COMPLETE CORPORATE FASHION PACKAGE.

From head to toe, from the function jacket to matching T-shirts. Thanks to a large color selection and a huge variety of products, any company will easily find a suitable corporate outfit, which can be decorated with their own logo to create a perfect appearance.

Printing or embroidery – your own message is the centre of attention, whereas the branding of JAMES & NICHOLSON remains discreetly in the background. Another example of the decoration competence:

After the breast pockets of the SOLID collection have been embroidered on, they can still be used without restriction as pockets.

See page 18 for more information on corporate fashion.

BRAND- STATEMENT

FUNCTION. STYLE. SUSTAINABILITY – IN CORPORATE WORKWEAR JAMES & NICHOLSON AND MYRTLE BEACH ARE AMONG THE BEST-KNOWN AND MOST POPULAR BRANDS.

With their huge variety of colors and sizes as well as their vast selection, both brands are convincing all along the line – at work and during leisure time! By regularly developing new products, we guarantee that the product lines are always up to date, both functionally and visually.

Therefore, the collection comprises stylish jackets with a water column of 10,000 mm and cordura insets as well as polo shirts in a multitude of colors and sturdy caps. Workwear pants fascinate you with cuts and sizes for any build – great looks and optimum freedom of movement are guaranteed by a higher stretch factor.

The great advantage: All the collections are perfectly matched in color for a perfect corporate appearance and can be combined with each other. The consistent style and cool details make the corporate outfit a reliable companion, which everybody likes wearing even after work.

However, James & Nicholson and myrtle beach not only set store by high functionality and good looks, the inner values of a product are just as important. The proportion of products made of sustainable fabrics has been on the increase for years. There are pants and T-shirts made of organic cotton or recycled polyester. Instead of downs a DuPont™ Sorona®-padding is used. Moreover, all the textiles are manufactured according to the criteria of OCS, REACH and STANDARD 100 by OEKO-TEX® and they are regularly checked.

Another benefit of James & Nicholson and myrtle beach: extremely short delivery periods due to a stock availability of approximately 98%.

MADE WITH RESPONSIBILITY

SOCIAL COMPLIANCE

As members of the 'BSCI/Business Social Compliance Initiative' we commit ourselves to implementing the BSCI code of conduct as part of our business relations with our manufacturers and thus to improving the working conditions within our supply chain and to producing our textiles fairly. This includes our clear commitment to the employees' right to freedom of assembly, protection against discrimination, and an adequate remuneration, that is, at least the statutory national minimum wage. Another central component is the occupational safety regulations. That is how we guarantee that the occupational safety regulations of the ILO (International Labour Organisation) are met. Child labour, forced labour or precarious jobs are not tolerated. Several social compliance departments in the countries of production test all the factories thoroughly and make sure that these conditions are met.

QUALITY STANDARD

The merchandise is regularly tested by certified testing institutes in the countries of production regarding the given parameter. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes the quality is continually controlled.

STANDARD 100 BY OEKO-TEX®

This standard guarantees that textile and non-textile product components pose no threat to health.

ADHERENCE TO THE REACH-REGULATIONS

We assure you that when manufacturing our myrtle beach products and JAMES & NICHOLSON textiles we meet the obligations of the REACH-regulations.

OCS STANDARD

When manufacturing garments of myrtle beach and JAMES & NICHOLSON, the Organic Content Standard is a standard for verifying and tracking the exact content of organically grown materials in a final product.

PROTECTION OF THE ENVIRONMENT

All the products of myrtle beach and JAMES & NICHOLSON are produced in an environmentally friendly way.

WORKWEAR MADE OF RECYCLED PET-BOTTLES

It is important to myrtle beach and James & Nicholson to sensibly process raw materials that have already been used instead of always entering new ones into the production cycle.

In this way, environmental pollution can be reduced and unnecessary waste can be avoided. Therefore, with the majority of their new workwear collection, the two brands use recycled polyester, which is reclaimed from plastic bottles. The bottles are cleaned, melted and spun into yarn. For example, the workwear trousers JN1812 contains PET bottles - and organic cotton. A classic example of 100% sustainable fabric as well as 100% function.

Jacket, T-shirt / polo shirt or pants: All the items made of or containing recycled polyester are as high-quality, breathable and hard-wearing as the previous ones. Both the yarn production and the adherence to the quality standards are regularly checked by the independent laboratory LABTECH.

LABTECH

Recycled polyester can be found on the following pages: 26, 32, 34, 36, 38, 40, 42, 138, 142, 164, 166 and 203.

COMING TO GRIPS WITH THE SUN THANKS TO WORKWEAR WITH CERTIFIED UV-PROTECTION

Many professions are practised outdoors all day or part of the day. Most of the year people working outdoors are exposed directly or indirectly to the sun. Therefore, their risk of contracting skin cancer is much higher than that of people working indoors.

UV-CLOTHING PROVIDES BETTER PROTECTION THAN SUNSCREEN

The best protection against harmful UV-radiation is provided by certified UV-protective clothing. It shields off radiation, does not have to be applied once again like sunscreen and therefore lasts all day. For the parts of the body uncovered by clothes sunscreen with a high sun protection factor and a headgear should be used.

THE MORE UPF, THE BETTER

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sun-screens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

A product marked with **UPF 50+** according to this standard blocks more than 98% of the harmful UV-rays.

TESTED TEXTILE UV-PROTECTION

Our products are manufactured and checked according to the strictest standard (Australia) for textiles with UV-protection.

The LABTECH Prüfungsgesellschaft mbH is officially accredited according to DIN EN ISO/IEC 17025 2005 and based on this standard, they test as an independent laboratory the UV-protective factor of our textiles.

THE DANGERS OF UV-RADIATION

-  UV-RADIATION ALSO EXISTS WHEN THE SUN IS NOT SHINING
-  ALSO PENETRATES THE CLOUDS
-  EXISTS INDEPENDENT OF OUTDOOR TEMPERATURE
-  PENETRATES LOOSE TISSUE
-  IS REFLECTED BY SURFACES SUCH AS METAL, WATER, CONCRETE

You will find UPF 50+ on pages 96, 98, 102, 104, 106 and 193. All the products with UV-protection are also listed separately in the special flyer 'UPF 50+'.

ONE TEAM. ONE OUTFIT.

There is no second chance for a first impression. Therefore, professional staff outfits are so important. Corporate fashion also boosts team spirit. Respectable, modern, reliable – corporate fashion is the textile figurehead of a company. This helps the employee to identify with the company and his colleagues.

JN877 WORKWEAR CARGO PANTS

Cargo pants for work and leisure

Durable, hard-wearing, comfortable mixed fabrics with BIONIC FINISH^{ECO} / Waistband with belt loops / Tearproof triple stitched seam / 2 front pockets, 2 back pockets / 2 cargo pocket with ruler pocket, mobile phone pocket, pen holder / Zip: YKK / Washable at 60°C, suitable for tumble-drying

Material:
Outer fabric (280 g/m²): 64% polyester, 33% cotton, 3% elastane

Sizes:
Short 25 / 26 / 27 / 28
Standard 42 / 44 / 46 / 48 / 50 / 52 / 54 / 56 / 58 / 60 / 62 / 64 / 66 / 68
Long: 94 / 98 / 102 / 106 / 110

BIONIC-FINISH^{ECO}

The water-repellent polymers are ramified until the drops are too big to get through them and to penetrate the textile. Environmentally harmful fluorine can be completely dispensed with.

mixed fabrics with BIONIC FINISH^{ECO}

NEW SIZES

2 cargo pocket with ruler pocket, mobile phone pocket, pen holder

Tearproof triple stitched seam

JN877 STAY CLEAN

They look good, are comfortable and just shake off the dirt. The highlight of these trendy cargo pants is the fluorine-free impregnation with BIONIC-FINISH^{ECO}. This environmentally friendly principle is following the example set by nature – water and dirt particles roll off like waterdrops on duck feathers.

DEMAND AS A MISSION

Today's makers value cool style, comfortable fit and everyday practicality. That's why our SOLID STYLE collection looks simple, but does a damn good job of combining functional materials and fashionable reflective elements with thoughtful details like triple stitching, CORDURA® reinforcements and concealed zippers. Unicolor, cool, modern!

Heatretention

JN882 IS ON THE BALL

Outside it is cold and wet, inside it is cool and dry. When standing, you will soon be cold, when moving, you will be too warm- this breathable softshell jacket is perfect for the in-between season. It avoids trapped heat, is wind- and weather-proof and on the inside it impresses with its durable and elastic interlock.

JN881 WORKWEAR SOFTSHELL LIGHT VEST - SOLID -

Professional, light softshell vest in 'classic' look with high-quality details

JN886 ADVANTAGES AT MINUS TEMPERATURES

Working well wrapped up even in cold weather is a thing of the past. The warm inner lining in the slim-fit softshell jacket braves adverse weather conditions. The integrated membrane holds off wind and water. Another benefit: a detachable hood. Just wear it.

WORKING WITH PROFESSIONALS

What the workwear of James & Nicholson distinguishes is a lot of experience: Not only our own experience but also the experience of craftsmen and handymen. Their inspirations are deeply rooted in this product line. Therefore, COLOR STYLE has been convincing for years with a durable and yet elastic quality, tearproof seams and numerous pockets. The zips and buttons are concealed. What is striking however, is the sporty bicolor design.

NO HALF-WAY MEASURES

The only way of getting better is putting the good to the test again and again. Therefore, we have optimized our professional line, developed it further and given it a new name: STRONG STYLE. The high-performance collection is hard-wearing and reliable. Important spots like knees and shoulders are reinforced with cordura, the seams are tearproof. Details like ventilation openings are taken for granted. Workwear as workwear should be.

FUNCTIONS & FEATURES

Whoever really wants quality, will also invest in details. Therefore, the workwear of James & Nicholson is equipped with high-quality functional materials and finishing. Let us give you an overview of the brands and functions.

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

3M™ SCOTCHLITE™ REFLECTIVE FABRIC

The reflective fabric enhances the visibility at night or in poor lighting conditions. (without protective function/no PPE).

THINSULATE™ INSULATION

The light-weight thermal insulation affords optimum protection against cold despite its minimum thickness. It even keeps you warm in damp or wet conditions. Thinsulate™ INSULATION offers excellent comfort and allows optimum room to move. It is extremely breathable, durable and easy-care.

DUPONT™ SORONA®

Sorona® renewably sourced fibre delivers superior performance benefits to today's fashion. Fabrics that use Sorona® are very soft, very strong and dry quickly. Sorona® helps fabrics stretch comfortably and retain their shape. And, it is made with plant-based ingredients.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

EASY CARE

This special finish makes shirts and blouses especially easy to iron. To preserve this function the textiles should not be overdried in the tumbler and you should avoid using an overheated iron.

BIONIC-FINISH® ECO

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONICFINISH®ECO protects man and nature.

TEXTILE UV-PROTECTION

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. This is based on the self-protection time of the skin.

WASHING (TUB)

The numbers in the tub indicate the maximum washing temperatures which must not be exceeded. The bar below the tub requires a more (mechanical) gentle treatment (e.g. programme for delicate fabrics). It designates washing programmes which are suitable for easy-care and delicate garments. Textiles made of cotton or mixed fibres should be pulled into shape when still wet. We recommend that textiles with prints or embroideries should only be washed on the reverse at a maximum of 40 degrees in order not to impair the quality of the print or embroidery.

IRONING (IRON)

The dots indicate the temperature scale of the irons. Textiles with prints or embroideries should only be ironed on the reverse.

TUMBLE DRYING (TUMBLE-DRIER)

The dots indicate the drying-grades of the tumble-drier. Textiles with transfer prints must not be tumble-dried.

DRY CLEANING (CLEANING DRUM)

The letters are intended for the textile cleaner. They indicate the possible solvents. The bar below the circle requires cleaning under limited mechanical strain, with a limited amount of moisture and at a medium temperature. Textiles with prints or embroideries should not be dry cleaned.

BLEACHING (TRIANGLE)

This symbol shows the textile cleaner whether the garment may be bleached or not.
